Class Limit: 20

This course will explore development theories and the politics of development from a gender perspective. The participants will become familiar with development debates, international political economy and feminist economics. We will discuss central topics like women's human rights, the relevance of reproduction and care economy, feminization of labor in order to understand the importance of gender equality to international development.

INTL 5685/18 – LATIN AMERICAN AREA STUDIES

Instructor: Dr. Petra Purkarthofer

Meeting Time:

Class Limit: 20

This course will explore development strategies pursued by specific Latin countries. We begin with an outline of the political and economic changes during the 19th and 20th century in Latin America. How did the paradigms in political economy shift from export expansion to import substitution industrialization and back to export-orientation again? Did state organization change over the course of time? We will also examine the political systems. We look at the main political actors and the power relations within the political systems as well as gender as one determining factor in politics. The characteristics of the presidential systems will be the concluding part of this section. We will then explore different theoretical approaches to development in Latin America: modernization, corporatism, dependency, socialism, and bureaucratic authoritarianism. We will analyze these models of development and more recently applied strategies since the rise of left governments by looking at specific countries. Social movements have become important political actors shaping the political landscape and the route to development. We will explore the relation between social movements and the state and more specifically their relation to the left governments in the ongoing transformation processes.

INTL 5900/17 – ADVANCED RESEARCH METHODS

Instructor: Dr. Guido Tiemann

Meeting Time: Monday, 6 p.m. – 10 p.m.

Class Limit: 20

This course builds upon INTL 5100 by providing additional analytical and theoretical background relating to research methods, data analysis, qualitative techniques, and statistical theory. Prerequisite: INTL 5100.
